

Topics in Human Space Exploration and Medicine

An Elective Lecture Series Presented by the Center for Space Medicine

Research Opportunities in Human Space Exploration

Speaker: Dorit B. Donoviel, Ph.D., Assistant Professor, Department of Pharmacology
and Center for Space Medicine, Baylor College of Medicine
Deputy Chief Scientist and Industry Forum Lead
National Space Biomedical Research Institute

Wednesday, December 05, 2012

12:10 – 1:00 p.m.

DeBakey Classroom M323

Learning Objective:

The space environment presents a unique paradigm that challenges our understanding of human physiology. A broad range of research opportunities exist, including basic mechanism oriented science as well as operations-focused technology and countermeasure development.
